## ISO 9969:2016 Thermoplastic pipes - Determination of ring stiffness

[View on Information Provider website](#)

### Abbreviation

ISO 9969:2016

### Valid from

04/01/2016

---

### Information provider

Standards New Zealand

### Author

International Organization for Standardization

### Information type

ISO Standard

### Format

PDF

---

### Cited By

[This resource is cited by 1 document \(show Citations\)](#)

---

### Description

The principle of the method specified is vertically compressing a length of pipe supported horizontally between two parallel flat plates moved at a constant speed which is dependent upon the diameter of the pipe, measuring the force and the deflection, plotting the force versus deflection, and calculating the ring stiffness as a function of the force necessary to produce a deflection of 0.03 nominal diameter diametrically across the pipe. Applies to pipes having a circular cross-section.
