Description

The marking system described applies to valves, fittings, flanges and unions used in piping connections which include flanged, soldered, brazed, threaded or welded joints.

These specified markings serve to identify the manufacturer, rating designation, materials of construction, and special service limitations imposed by the manufacturer

For assistance with locating previous versions, please contact the information provider.

ANSI/ASME B16.3-1985 and ANSI/ASME B16.5-1988 cite MSS SP 25-1978, which is not currently available online. We have provided you with a link to this more recent version for your information only.
