Building Code Clause B1 - Structure

[View on Information Provider website](#)

Abbreviation

NZBC B1

Valid from

01/07/1992

Information provider

Parliamentary Counsel Office

Information type

Legislation

Format

PDF

Description

Building Code Clause B1 Structure, requires buildings to withstand likely loads, including wind, earthquake, live and dead loads (people and building contents). This clause sets requirements around the combination of loads that buildings, building elements and sitework are likely to experience during construction, alteration and throughout their lives. The performance requirements outline how buildings should be stable, not degrade and withstand physical conditions to protect lives and other property. It makes due allowance for the intended use of a building, the consequence of failure and other limitations.
