### Description

This electrical Code of Practice sets acceptable levels of harmonic voltages and currents which may be introduced into an electricity supply system by a consumer's installation. This document shall not apply to signals introduced by any Electricity Distributor for the purpose of load control. The levels specified in section 3 shall not apply to the works of any Electricity Distributor.

### Scope

This electrical Code of Practice sets acceptable levels of harmonic voltages and currents which may be introduced into an electricity supply system by a consumer's installation. This document shall not apply to signals introduced by any Electricity Distributor for the purpose of load control. The levels specified in section 3 shall not apply to the works of any Electricity Distributor.
