**Description**  
  
The Standard states the requirements for the performance of windows to be installed in exterior walls. The properties covered are strength, stiffness, dimensional accuracy, operating facility, air leakage and water leakage.

## Table of Contents

### **1 Scope**

### **2 Interpretation**

### **3 General**

### **4 Interrelation of properties**

### **5 Required performance ratings**

### **6 Testing, marking and certificates**

### **7 Windows for buildings not requiring specific design**

### **8 Dimensional accuracy**

### **9 Operating of opening sashes**

### **10 Overall strength and deflection**

### **11 Air leakage**

### **12 Water leakage**

### **13 Torsional strength for sashes**

### **14 Sequence of measurements and tests**

### **15 Other performance properties**

### **16 New Zealand Standard Certification Mark Scheme**

## **Appendix**

### **A Glossary of terms relating to windows**

### **B Testes for strength, air leakage and water leakage**

## **Table**

### **1 Selection of windows for buildings not requiring specific design**

### **2 Wind areas**

### **3 Operating force for open sashes**

4 Air leakage
