Description

Deals with interior and exterior solid plastering. Provides methods for the mixing, application and curing of cement plasters on solid substrates, rigid and non-rigid backings including backing specifications.

Scope

This Standard sets out the requirements for solid plaster in buildings to achieve structurally sound, hard, durable and water resistant surfaces. It deals with the preparation, mixing and application of cement based plasters to walls, ceilings and soffits of solid substrates, and stucco on rigid backing and non-rigid backings. The Standard applies to exterior and interior walls where impact loads are limited to soft body impacts associated with domestic use. For use in interior spaces the relative humidity must be less than 90 %.

Note: Special applications such as squash courts and swimming pools **are outside the scope** of this Standard.

Gypsum based plaster and modified or proprietary modified plaster coatings **are not included** in this Part of the Standard.
