### Description

This Standard sets out the essential safety requirements for all gas appliances intended for installation or use in New Zealand. It is not a design code and therefore it does not address matters of performance, appearance or durability except where they are relevant to safety.

It covers all gas appliances and components supplied with them, that use, or are designed to use, gas, whether or not they also use, or are designed to use, any other form of energy. Cited in the Ministry's Simple House Acceptable Solution.

### Scope

The requirements are intended to protect persons, domestic animals and property from fire, explosion, release of noxious gases and physical injury hazards that may arise from gas appliances

For assistance with locating previous versions, please contact the information provider.
