Description

This Standard specifies general requirements for the competence to carry out tests and/or calibrations, including sampling. Covers testing and calibration performed using standard methods, non-standard methods, and laboratory-developed methods. Applicable to all organizations performing tests and/or calibrations, regardless of the number of personnel or the scope of the testing and/or calibration. For use by laboratories in developing their quality, administrative and technical systems.

This Standard is identical with and has been reproduced from ISO/IEC 17025:1999.
