Description

This Standard specifies the requirements for the production and supply of hot-rolled structural steel bars and sections for structural and engineering purposes in -

- (a) ordinary weldable grades; and
- (b) weather-resistant weldable grades.

Scope

This Standard does not cover the following:

- (i) Floorplates and slabs (see amdt 1).
- (ii) Structural steel hollow sections (see AS 1163).
- (iii) Bars supplied to chemical composition only (see AS 1442).
- (iv) Steel reinforcing bars for concrete (see AS 1302).

Note: Guidelines to purchasers on requirements that should be specified by the purchaser and those that should or may be agreed on at the time of enquiry or order are given in Appendix A. Guidelines on cold-bending of round bar during fabrication are given in Appendix D.

For assistance with locating previous versions, please contact the information provider.

Notes/comments

This Standard is not available online from Standards New Zealand, the link refers users to AS 3679.1-1990 as the relevant joint equivalent Standard.
