## Practice Advisory 12: Unstiffened eccentric cleat connections in compression

[View on Information Provider website](#)

Valid from

01/04/2010

---

Information provider

Ministry of Business, Innovation and Employment

Information type

Section 175 guidance

Format

Website

---

Description

If you're a structural design engineer, you need to be aware of problems when using unstiffened eccentric cleats to connect compression members such as braces and frame members to supporting members. This guidance also alerts you to a flawed design method.

For assistance with locating previous versions, please contact the information provider.
