## Proposed regulations for dam safety - Consultation

[View on Information Provider website](#)

### Abbreviation

Dam safety

### Valid from

11/06/2019

---

### Information provider

Ministry of Business, Innovation and Employment

### Information type

Section 175 guidance

### Format

HTML, PDF, Word

---

### Description

These regulations propose to establish a nationally consistent approach that will protect people, property and the environment from the potential impact of a large dam's failure without imposing undue compliance costs.

The proposed new scheme pulls together post-construction regulatory requirements into a single, consistent nationwide framework. The owners of dams will be responsible for ensuring that their dams are being managed appropriately, proportionate to the risk they pose.

The proposals aim to ensure that classifiable dams are well maintained and regularly monitored, and that potential risks of dam failure are reduced.

The scheme also recognises that the dam safety requirements need to be regularly reviewed because the consequences of dam failure can change over time due to factors such as site conditions, urban development or population growth.

For assistance with locating previous versions, please contact the information provider.

### Notes/comments

**The Consultation period is open from 11 June 2019 - 6 August 2019, 5pm.**
