Slip resistant walking surfaces – safety of walking surfaces in and around buildings

[View on Information Provider website](#)

Valid from

01/02/2014

Information provider

Ministry of Business, Innovation and Employment

Information type

Section 175 guidance

Format

Website

Description

Slippery walking surfaces can be hazardous. Every year ACC pays out many millions of dollars for injuries suffered as a result of falls on the same level due to 'slipping, tripping or stumbling'. Building users expect buildings to be safe, and the Building Code therefore includes a requirement for walking surfaces on building access routes to be slip-resistant.
